

POWER ACCESS CONTROL OPTIONS

IPHONE/ANDROID APP

- iPhone/Android GarageMate App and Interface Device Connected to Opener and Ready for Quick, Easy Set-Up.

HAND-HELD REMOTES

- Model 4440T is a one button hand-held wireless remote transmitter. Garage door opener style. Two or four button options available.
- Model 4440TK is a one button hand-held wireless remote transmitter. Pendant style. Two button option available.

KEYPAD, CODED ENTRY

- Model 4437S is a wireless wall mount keypad that activates with the input of a 4-digit code. For exterior use, weather-resistant.

PRESSURE MATS

- Model 4439 CVP pressure mat activates the door with 5 pounds of force and operates on 24V. This can be concealed under carpeting or flooring and functions as a hidden switch. Dimensions are 6" x 23"; thickness is 3/32". Mat has two 20' lead wires that plug into the designated input terminals on the main PC board.
- Model 4459 CKP industrial duty pressure mat activates the door with 22 pounds of force. This heavy-duty mat has ramped edges for ease of use with wheelchair, rollator, walker, etc.. Dimensions are 12" x 36"; thickness is 1-1/2". Mat has two 20' lead wires.

MOTION-ACTIVATED / NO TOUCH

- Model 4499SFA is a family of touchless wall mount switches that activate with a hand wave. Adjustable 2" – 24" detection zone with durable all-weather stainless steel plate. Adjustable audible alert settings with silent mode and illuminated blue center that turns green upon activation. Ideal for sanitary environments, patient rooms, and common areas to prevent the spread of germs. Mounts to electrical box. Sensing range is adjustable between 2" – 24". Mount options include double gang (4.5" x 4.5" x 0.98"), single gang (4.5" x 2.75" x 0.98"), and jamb mount (4.5" x 1.68" x 0.98"). Requires low voltage wiring for constant power.

ACTUATION COLUMNS

- Model 4440NAC is a 9" bar style wireless actuation column, with contoured edges and push activation from anywhere on device; Dimensions are 6" x 9" x 1-1/2". Rounded for easier touch activation (wheelchair bump, foot, arm, elbow, etc.). Can be placed on wall as a hand or foot control.
- Model 4440TAC is a 3' wireless actuation column, with contoured edges and push activation from anywhere on device; Dimensions are 36" x 6" x 2-1/2". Rounded for easier touch activation (a wheelchair bump, a foot, arm, elbow, etc.). Large surface area allows for hand or foot activation.

PUSH PLATES

- Model 4496SR is a wireless 6" round push plate that does not require a lot of force to activate. This option is our largest push plate option, so it is a forgiving target. *(wired version available: Model 4498SR)*
- Model 4495SQ is a wireless 4-1/2" square push plate that does not require a lot of force to activate. This is our next largest push plate size, so still a forgiving target, but not as large a surface area as the round option above. *(wired version available: Model 4497SQ)*
- Model 4494JS is a jamb switch push plate, so a smaller option for push activation. Dimensions are 1-3/4" x 4-3/4". *(wired option available: Model 4493JS).*
